Designed by dentists for dentists.

The freedom to provide quality care where it's needed.

Anyone can build a box and load it with dental equipment, but whether it's truly dentist-friendly is another story. When you step into a Dental Access Mobile Clinic, you know you're in a dentist-designed space, from the precision placement of the equipment to the efficient use of precious space. You may forget you're in a mobile clinic. In fact, that's the point.

You need it fast? No problem.

Dental Access Temporary Offices are available for quick-turn-around lease for natural disasters and construction/renovation projects. If you're looking to buy a new vehicle, we work with you to turn that around in a timely manner.

Available for quick-turn-around lease or purchase.

Driven by a desire to help.

John E. Reese III, D.M.D., saw a need to provide quality on-site dental services to schoolchildren in low-income areas, many of whom were covered by Medicaid but still didn't have a regular dentist. In his search to find a suitable clinic on wheels, he concluded the vans available were either lacking basic necessities or simply didn't consider the actual practice of dentistry. So Dr. Reese partnered with an industry leader in specialty transportation. The rest is history.

It drives like a dream.

The modest-sized chassis makes the Dental Access Mobile Clinic easy to maneuver. No special license or training is needed to drive our standard model.

A practice-saver when disaster strikes.

Hurricanes. Floods. Tornadoes. They have the potential to level a thriving practice. It's been shown that dental practices begin to lose patients after just two weeks of stopped service. Leasing a Dental Access Temporary Dental Office provides a great short-term solution that allows you to provide top-level services to your clients until your permanent office is up and running again. In many cases, insurance companies will even cover the cost.

A great interim solution for office remodels and new construction, too.
