

Quick-Turn-Around Leasing

When your office is closed, keep revenues rolling in.

During construction, remodel or when natural disaster strikes, lease a Dental Access Temporary Office to continue providing quality care.

The dentist is in the details.

From precision placement of equipment to the efficient use of precious space, our dentist-designed units let you forget you're in a temporary office. In fact, that's the point.

A practice-saver during remodel, new construction or when disaster strikes.

It's been shown that dental practices begin to lose patients after just two weeks of stopped service. Leasing offers a great short-term solution, and in the case of disaster, insurance companies may even cover the cost.

- Short-term leases available (from one week to a year or more)
- Delivered and set up on site. Removed at end of term.
- Includes all major equipment: chairs, stools, carts, digital X-ray units, sterilizer, cabinetry, computer monitors, patient lights and more.
- Multiple vehicle configurations available.

Standard models include:

- Two fully-equipped treatment rooms (including intraoral x-rays)
- Panoramic x-ray
- Statim sterilizer
- Central dry suction
- Central air compressor (oil free)
- Roof-mount air conditioners
- Electric heaters
- Restroom (on some models)
- Shore power cord or generator to provide adequate power supply for all components
- 110V and 12V lighting throughout
- Self-contained fresh water system and city water/sewer hook-ups
- Electric water heater
- Leveling system
- Wheelchair ramp

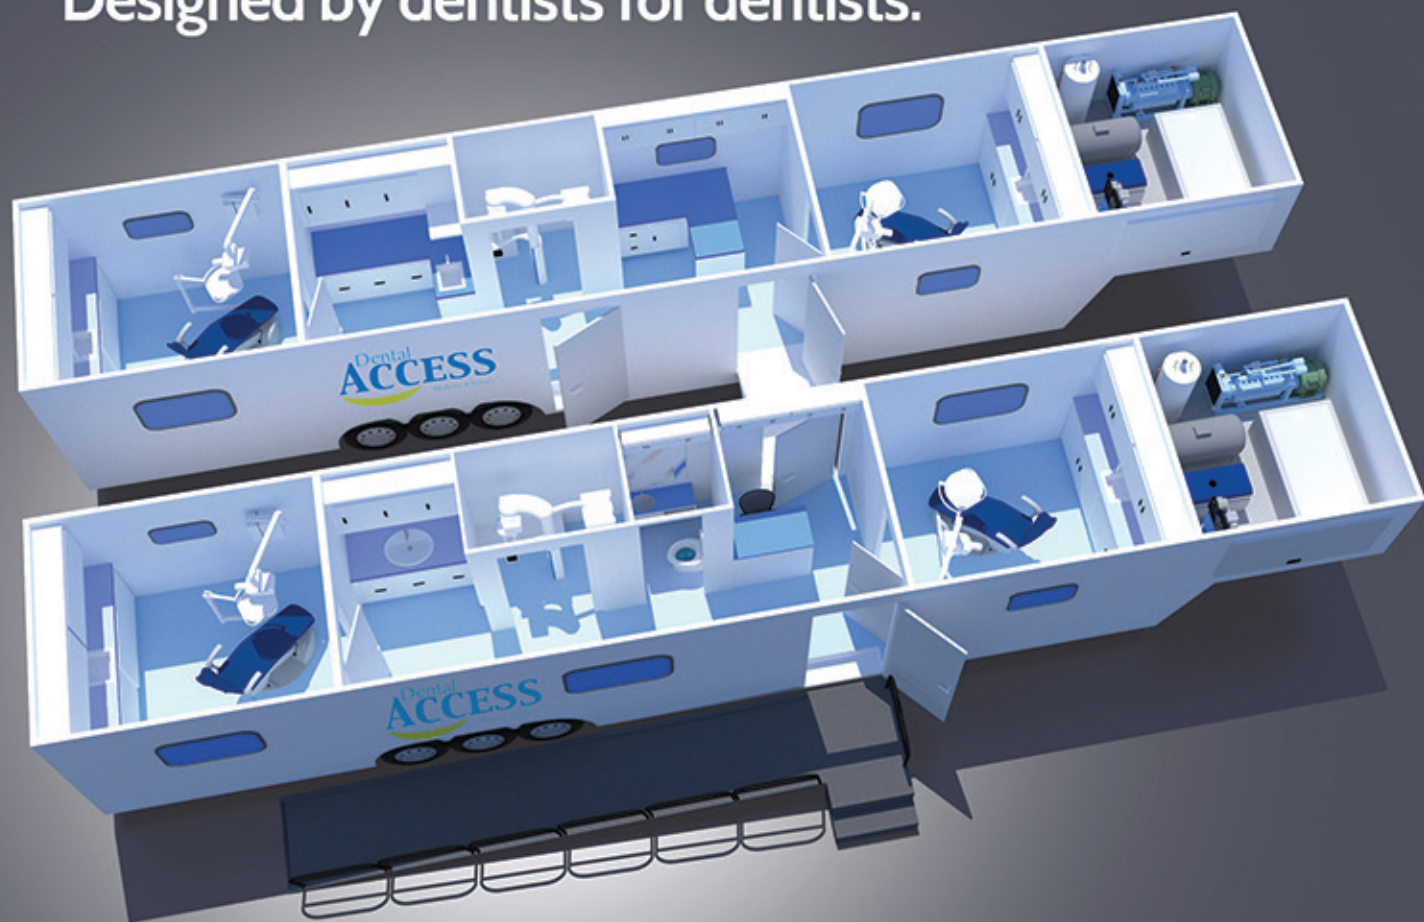

You need it fast? No problem.

Dental Access Temporary Offices
are available for quick turn-around lease.
(Available for purchase, too. Learn more at dentalaccess.com.)

Designed by dentists for dentists.

John E. Reese III, DMD founded Dental Access Carolina, LLC, a mobile dental practice. When its success was proven, he designed his own mobile clinic and now markets them internationally.
